FINANCIAL AND COMMERCIAL SITUATION
(Prepared by the Office of the Fiscal Representative)

In July, as in June, the level of exportation continued above the level maintained during the same period last year. The improvement during July is accounted for by larger shipments of coffee, bananas, and sugar.

A larger quantity of coffee was shipped during the month than was shipped in July 1940. There has also been a substantial increase in coffee prices. The unit value of coffee shipments during July 1940 was Gde. 0.50 per kilo. For coffee shipped during July 1941 an average price of Gde. 0.79 has been received.

The Gatun, a ship of the Standard Fruit Company picking up bananas from the southern ports was damaged in the harbor of Jacmel during the month and could not continue its scheduled run. Despite this temporary setback bananas shipments for the month still exceeded the quantities shipped last July. The quantity of bananas shipped during the first ten months of the present fiscal year is now well in excess of the total for the twelve months of last fiscal year.

Sisal shipments failed by a small margin to reach the exceptionally high quantity exported in July 1940. Sisal is another product which has exceeded all previous export records.

The value of imports for the month varied but little from the value recorded for imports during July 1940.

Agricultural Development — There was published in the April bulletin a copy of a communiqué announcing that an agreement between the American and Haitian Governments had been reached in principle on the subject of a long term program of cooperation for the development of Haitian economy and agriculture. During the month a corporation was chartered for the purpose of carrying out the agreement.

Receipts — Total government receipts were 5.7 per cent above the amount collected last July despite a decrease in returns from the import tariff.

Duties on imports declined from Gdes. 1,223,000# collected in the previous July to Gdes. 1,199,000. This decline was however more than offset by increased returns from the export tariff which were Gdes. 144,000 against Gdes. 79,000 in the previous July. Total customs revenues (import duties, export duties and miscellaneous customs receipts) for the month were Gdes. 1,347,000 as compared with Gdes. 1,307,000 in July 1940.

#One gourde equals twenty cents, U.S., and the gourde is, by law, exchangeable on demand and without expense at the fixed rate or five gourdes, for one dollar, U.S.

Internal revenue receipts increased from Gdes. 289,000 in July 1940 to Gdes. 331,000 in July just passed.

Miscellaneous government receipts increased from Gdes. 9,000 in the previous July to Gdes. 18,000.

The service charge made by the Internal Revenue Service for collection of communal receipts amounted to Gdes. 20,000 against Gdes. 17,000 in the previous year. A decree-law of July 3, 1941 extended the collection of communal revenues by the Internal Revenue Service to all communes.

The yield from various sources of revenue for the elapsed period of the present fiscal year compares with the corresponding period in 1939-40 as follows:

	First ten months of 1940-41	First ten months of 1939-40
	Gourdes	Gourdes
Import duties	15,156,000	15,934,000
Export duties	2,418,000	2,637,000
Miscellaneous customs	36,000	65,000
Total	17,610,000	18,636,000
Internal Revenues	4,302,000	4,564,000
Miscellaneous	298,000	160,000
Internal Revenue Service charge on communal receipts	178,000	187,000
Total	22,388,000	23,547,000

Expenditures — Expenditures from revenue were Gdes. 2,268,000 as compared with Gdes. 2,494,000 in July 1940. The decrease amounts to 9.1 per cent.

During the elapsed ten month period of the fiscal year expenditures have been Gdes. 20,171,000 as compared with Gdes. 24,018,000 during the corresponding period of the previous fiscal year. For the period the decrease has been Gdes. 3,847,000 or 16.02 per cent. Of all government Services or Departments there have been but two (Department of Foreign Affairs and Department of Commerce) which have shown increased expenditures over last year. All other branches of the Government have contributed in a fairly uniform manner to the total decrease in expenditures.

Treasury Position — With revenue receipts in July totalling Gdes. 1,715,400 and expenditures from revenue totalling Gdes. 2,267,700 an operating deficit of Gdes. 552,300 was recorded for the month. July is a month in which expenditures usually exceed revenues and, on the average, by a larger margin than in the month just finished.

For the ten month period of the present fiscal year revenues have exceeded disbursements by Gdes. 2,218,000 - a better relative showing than last year when disbursements over the same period were Gdes. 471,000 in excess of revenues.

The unobligated treasury surplus as of July 31, 1941 amounted to Gdes. 1,082,000.

Public Debt The gross public debt of the Republic as of July 31, 1941 was Gdes. 67,943,000 as compared to Gdes. 59,329,000 July 31, 1940 and Gdes. 67,588,000 June 30, 1941. Expenditures in July under the public works contract of 1938 amounted to Gdes. 356,000 bringing the total expended to date to Gdes. 24,197,000.

FOREIGN COMMERCE

The value of Haiti's foreign commerce for the month of July, 1941, was Gdes. 5,194,000, as compared with a value of Gdes. 4,358,000, in July, 1940. There was an increase of Gdes. 836,000, or of 19 per cent.

Import values for the month of July, 1941, amounted to Gdes. 2,627,000. For the month of July, 1940, imports were valued at Gdes. 2,597,000. Export values amounted to Gdes. 2,566,000, during July, 1941, and during July, 1940, exports were valued at Gdes. 1,760,000.

Import values exceeded export values by Gdes. 61,000, during the month under study. During July, 1940, import values exceeded export values by Gdes. 837,000.

During the October-July period of 1940-1941, foreign commerce values amounted to Gdes. 57,277,000, as compared with a value of Gdes. 58,939,000, for the corresponding period of the previous fiscal year. There was a decrease of Gdes. 1,662,000, or of 3 per cent.

Import values for the first ten months of the present fiscal year amounted to Gdes. 31,130,000. Exports for the same period were valued at Gdes. 26,147,000. Import values exceeded export values by Gdes. 4,983,000.

During the first ten months of the fiscal year 1939-40, import values amounted to Gdes. 34,710,000, and export values for that period amounted to Gdes. 24,229,000. Import values exceeded export values by Gdes. 10,481,000.

Coffee Exports of coffee for the month of July, 1941, amounted to 635,228 kilos, valued at Gdes. 499,229, as compared with 186,565 kilos of that commodity, valued at Gdes. 93,542, exported in July, 1940. There was an increase of 240 per cent in quantity and of 434 per cent in value.

During the October-July period of the fiscal year 1940-41, exports of coffee amounted to 19,171,793 kilos, which were valued at Gdes. 9,955,385. During the corresponding period of the previous fiscal year, 15,232,071 kilos of coffee, valued at Gdes. 9,709,858, were exported. There was an increase of 26 per cent in quantity, and of 3 per cent in value.

Of the 19,171,793 kilos of coffee exported up to the end of July, 707,413 kilos were shipped under the 1941-42 quota. This amount of coffee will be held in bond in the United States and not entered for consumption until October 1, 1941.

Cacao — During the month of July, 1941, exports of cacao amounted to 14,044 kilos, valued at Gdes. 8,472, as compared with 22,724 kilos of this commodity, valued at Gdes. 8,407, exported in July, 1940. There was a decrease of 38 per cent in quantity, and an increase of 0.77 per cent in value.

During the first ten months of the present fiscal year, 1,457,241 kilos of cacao, valued at Gdes. 646,899, were exported. This compares with 1,169,796 kilos of this product, valued at Gdes. 472,619, exported during the corresponding period of the fiscal year 1939-40. There was an increase of 25 per cent in quantity and of 37 per cent in value.

Logwood — Only 75,010 kilos of logwood, valued at Gdes. 2,555, were exported during the month of July, 1941. During the month of July, 1940, there were no shipments of that commodity.

Exports of logwood during the October-July period of the present fiscal year amounted to 1,925,010 kilos, valued at Gdes. 66,993, as compared with 3,283,000 kilos of this product, valued at Gdes. 91,848, exported during the first 10 months of the fiscal year 1939-40. There was a decrease of 41 per cent in quantity and of 27 per cent in value.

Cotton — No cotton was shipped during the month under study, nor were there any shipments during the corresponding month of the previous fiscal year.

Exports of cotton during the first ten months of the fiscal year 1940-41, amounted to 2,087,035 kilos, valued at Gdes. 1,740,993, as compared with 3,105,003 kilos of this commodity, valued at Gdes. 3,048,302, exported during the October-July period of the fiscal year 1939-40. There was a decrease of 33 per cent in quantity and of 43 per cent in value.

Bananas — During the month of July of the present fiscal year, 324,361 stems of bananas, valued at Gdes. 771,238, were shipped. During the month of July, 1940, exports of bananas amounted to 286,230 stems, valued at Gdes. 407,041. There was an increase of 13 per cent in quantity and of 89 per cent in value.

Exports of bananas for the October-July period of 1940-41, amounted to 2,585,873 stems, valued at Gdes. 6,107,897, as compared with 1,604,019 stems of bananas, valued at Gdes. 2,186,571, shipped during the corresponding period of the previous fiscal year. There was an increase of 61 per cent in quantity and of 179 per cent in value.

The values shown for bananas exported in issues of this Bulletin previous to February, 1941, were based upon and represented the actual prices paid to growers. The February issue and succeeding issues of the Bulletin carry values showing the F. O. B. cost to the Standard Fruit and Steamship Company of the bananas exported. Tables were published in the February Bulletin revising, for the first four months of the present fiscal year, the value of banana exports in conformity with the new method of determining their value.

Sisal — Shipments of sisal during the month under study amounted to 1,591,325 kilos, which were valued at Gdes. 717,519. During the month of July, 1940, exports of sisal amounted to 1,625,586 kilos, with a value of Gdes. 826,809. There was a decrease of 2 per cent in quantity and of 13 per cent in value.

During the October-July period of the present fiscal year, 8,905,093 kilos of sisal, valued at Gdes. 3,362,581, were exported, as compared with 6,700,428 kilos of this commodity, valued at Gdes. 2,849,370, exported during the first ten months of the fiscal year 1939-40. There was an increase of 33 per cent in quantity and of 18 per cent in value.

Raw sugar — Exports of raw sugar amounting to 2,032,828 kilos, valued at Gdes. 257,175, were recorded for the month of July, 1941. During the corresponding month of the previous fiscal year, 4,929,kilos of this commodity, valued at Gdes. 1,152, were exported. There was an increase of 2,027,899 kilos in quantity and of Gdes. 256,023 in value.

During the October-July period of 1940-41, exports of raw sugar amounted to 17,787,819 kilos, valued at Gdes. 1,729,143, as compared with 26,603,069 kilos of this product, valued at Gdes. 4,205,336, exported during the corresponding period of the fiscal year 1939-40. There was a decrease of 33 per cent in quantity and of 59 per cent in value.

Other exports — When a comparison was made between the October-July period of the fiscal year 1940-41, and the corresponding period of the previous fiscal year, the following increases in quantities exported were noted: lignum-vitae, 110 per cent; corn, 79 per cent; refined sugar, 249 per cent, and goatskins, 11 per cent.

Decreases in quantities exported were noted as follows: cottonseed cake and meal, 1 per cent; rum, 50 per cent, and honey, 85 per cent.

Ports — When the month of July, 1941, was compared with the month of July, 1940, it was found that the ports of Belladère, Cap Haitien, Cayes, Gîore, Jacmel, Port-au-Prince and Port-de-Paix had recorded increased export values.

When the October-July period of the present fiscal year was compared with the corresponding period of the previous fiscal year, increased export values were noted for the ports of Belladère, Cap Haitien, Cayes, Fort Liberté, Glore, Gonaives, Jacmel, Miragoâne, Ouanaminthe and Port-de-Paix.

Imports

A comparison between the month of July, 1941 and the month of July, 1940, shows the following increases in quantities imported: cement, 69 per cent; paints, 20 per cent; cotton piece goods, 18 per cent; live animals, 80 per cent; butter, 23 per cent, and beverages, 61 per cent.

Increased import values were noted for the following commodities: glassware, 35 per cent; manufacture of iron and steel, 12 per cent; perfumery, 53 per cent; paper and its manufactures, 65 per cent, and rubber goods, 85 per cent.

The following decreases in quantities imported were found: kerosène, 63 per cent; gasoline, 93 per cent; chemical and pharmaceutical products, 21 per cent; soap, 5 per cent; lumber, 67 per cent; automobiles, 25 per cent, meats, 58 per cent; fish, 54 per cent, and lard, 24 per cent.

Imports of machinery and apparatus declined in value by 18 per cent, and imports of tobacco by 17 per cent.

When a comparison of the first ten months of the present fiscal year and the first 10 months of the fiscal year 1939-40 was made, it was found that imports of lard had increased in quantity by 21 per cent.

Increased import values were noted for the following articles: glassware, 12 per cent; hides, leather and their manufactures, 3 per cent; and rubber, goods, 10 per cent.

The following decreases in quantities imported were no found: kerosene, 12 per cent; cement, 10 per cent; chemical and pharmaceutical products, 15 per cent; soap, 21 per cent; cotton piece goods, 11 per cent; lumber, 39 per cent; automobiles, 17 per cent; live animals, 63 per cent; wheat flour, 18 per cent; rice, 40 per cent, and beverages, 35 per cent.

Imports of manufactures of iron and steel declined in value by 30 per cent; machinery and apparatus by 24 per cent, and tobacco by 18 per cent.

Ports

All ports with the exception of Fort Liberté, Glore, Miragoâne, Port-au-Prince and Saint Marc recorded increased import values when a comparison was made between the months of July, 1941 and July, 1940.

When a comparison was made between the first ten months of the present fiscal year and the first ten months of the previous fiscal year, it was found that only the ports of Cap Haitien and Fort Liberté showed increases in the value of imports.

Countries of Origin — The following table shows the percentages of Haiti's imports from the principal countries of origin for July 1941, and July 1940, as well as for the ten month period of the present fiscal year as compared with the same period last year. The percentages shown include all imports from the colonies, dependencies and dominions of the countries listed.

	July 1941	July 1940	Oct. to July 1941	Oct. to July 1940
United States	84.16 %	75.23 %	83.87 %	72.03 %
British Commonwealth	10.17	16.66	8.48	11.84
Japan	3.48	3.25	3.26	2.71

" upon request	44
Notifications sent for sanitary irregularities	1275
Cases referred to the Courts	88
Decisions obtained	79
Cases referred to the Courts by the Police	11

Mosquito Control — 1,053 mosquito breeding places were reported by the Sanitary Inspectors; they were found in various receptacles.

Anopheles — Larvae were reported 19 times, found in the following places: Ave. Saint Martin, in the vicinity of the Aviation field, at "Nan Palmiste" and at Bourdon.

Measures applied — Spraying of creosoted oil, Paris Green, drainage, & filling operations, larvicid fish.

Larvicid used

Diesel oil	468	Gals
Kerosene	86	"
Creosote	25	"
Mixture of Lime and Paris Green	1895	lbs

Flies — A mixture of 12 lbs of pyrethrum and 24 gallons of kerosene was used to destroy flies in the markets and at the slaughter house.

Removal of Refuse — 1,810 truckloads of refuse were hauled from the streets and other sources to the dumping places. 87 truckloads of rubbish were also taken from various public institutions to the littoral and used for filling. The trucks made also 4 trips to haul luggage having belonged to persons deceased from contagious diseases and to disinfect the houses.

72 dead animals were buried by the Service.

Rats — 103 rats were trapped and turned over to the Laboratory of the General Hospital, findings for rodent plague were as usual negative. 7 dead rats were found on the highways and buried.

Nightsoil Removal — 6 public latrines or latrines belonging to public institutions and 18 private latrines were cleaned and disinfected by the nightgang of the Service.

AGRICULTURE
(Prepared by the Agricultural Production
and Rural Education Service)

AGRICULTURAL EXTENSION

Coffee — In connection with the project of coffee extension carried out in cooperation with the J.G. White Engineering Corp., a survey made in the district of Dondon has shown the following results:

	Plants inspected	Plants doing well	%
Section of Matador	11,174	7,820	70
Section of Laguille	4,123	3,924	95

At Platons, 924 coffee plants, 813 bananas and 831 other shade trees were lined out.

In the region of Camp Perrin, the peasants prepared 114 manure pits. At Beaumont (Jérémie) only 10 were prepared.

During the month, 7,358 bags of coffee were inspected, 908 of which had to be reconditioned.

Six coffee samples were tested at our Cup-testing Room.

Cotton — Eight hundred and sixty three bags of raw cotton were inspected at Port-au-Prince and 3,196 in the Artibonite where 37 bags had to be reconditioned.

About 30 bags of seeds donated by Messrs Reinbold and Madsen were distributed in the Artibonite.

Banana — Plantings took place as follows during the month:

North West	9,634 suckers
Marmelade	20,465 "
Terre Neuve	850 "
Jacmel	1,642 "

The analyses of the soil samples taken at Saint Raphael were completed. Two samples of water, one from the Grande Rivière du Nord and the other from a well located on the habitation Cadouche, were found to be suitable for irrigation purpose.

Rice — On the Hinche farm, the total area planted to rice now amounts to 13 hectares. The varieties used are:

Rexoro	4 hectares
Fortuna	6 "
Mira, Camilla and Three-Month Fortuna	3 "

Coconut — The Damien nurseries have distributed 4,723 plants and have 5,000 more ready for distribution.

Citrus — The same nurseries have also distributed 7,050 native lime seedlings intended for the following regions:

Ile à Vache	6,600
Jérémie	300
Petit Goâve	150

Soybean — Trial plots were planted at Saint Michel de l'Attalaye, André (Gonaives) and Guyon (Saint Marc), in order to study the possibilities of the crop in various regions. The seeds germinated after an average of 5 days and in no place did they germinate less than 85 %.

At Fonds des Nègres, the trial plots cover 1-1/2 hectares. There, only the variety Mamloxi is thriving. The other varieties planted, Minsox, Hongkong, Mammoth yellow, Easy-cook and Cayuga, are not doing so well.

At the Agricultural settlement of Mont Organisé, trials will be conducted with and without inoculation on 2 hectares. Already 3,306 square meters have been planted.

Other Crops — A shipment of 1,600 lbs. of Chili pepper to the U.S. was sold at Gdes. 0.46 a lb. A second order for 5,000 lbs. was received from the same consignee. One of the fields of that crop established on the Damien farm is in full bearing. 538 lbs. were already harvested and are being dried. The best plants were selected for the production of seeds.

Nine hundred cantaloups were harvested on the Damien farm and sold.

The fan-palm nursery established at Dondon has been extended to cover 50 sq.m.

One kilo of dried Derris roots were sent to the Puerto Rico Experiment Station in order to have their rotenone contents determined.

Irrigation — The intakes of the systems of Parrois and Bourgeot have been ruined by a flood. In the Artibonite, 3,780 linear meters of canals were cleaned (1,480 in the region of Saint Marc and 2,300 in the region of Gonaives).

In the region of Jacmel work has progressed as follows: The spur of the intake of the Oudaille system was repaired with the help of 48 users. Improvement of that intake is contemplated by the J.G. White Eng. Corp. A gate has been constructed near the Marigot farm school. The intake of the Desmarattes system was also repaired. At Meyer, materials were collected on the spot for the improvement of the canal on a length of 125 m. That part of the canal will be in masonry. In the region of Lafond, all the canals were cleaned.

Forest — At Morne des Commissaires, roads leading to the mill shed and to the Refuge were repaired. A total of 540 pine-trees were felled, 477 of which were 18 to 22" diam.

Two thousand four hundred and eighty-eight logs 12 to 22' long were prepared. Sales amounted to 34,666 b.f. In addition 4,000 b.f. unsaleable lumber was donated, 1,500 to the Garde d'Haiti outpost at Fonds Verrettes and 2,500 to the peasants of the region.

Fifty seven infringements upon forest regulations were reported entailing 23 condemnations. Licences were issued for the following operations:

Felling	3
Clearing	40
Growing of annual crops	76

Dairy and animal husbandry — Milk production on the Damien farm amounted to 2,368-3/4 liters, 2,115-1/2 of which were sold. The balance was used for the preparation of cream or butter. Butter made on the farm amounted to 1,802-1/2 lbs., 1,406 of which have been sold.

The sires on the farm were used for breeding as follows:

Stallions	5
Bulls	3
Jack	3
Boars	3

Five Duroc-Jersey pigs were sold to breeders in the Cul-de-Sac plain.

Eight animals were treated at public clinics and two dogs were vaccinated against rabies. Twenty five hogs (7 belonging to the Martissant farm-school and 18 belonging to various breeders) were vaccinated against cholera.

Miscellaneous — Samples of coffee, cocoa, honey, cotton, lemongrass oil, lime oil and vetiver, as well as samples of cassava, were prepared and shipped to the Toronto Annual Fair by the Service.

RURAL EDUCATION

Supervision — During the month of June, the supervisors have visited 147 schools, viz. 40 farm schools, 54 rural schools, 40 borough schools, 9 communal schools and 4 agricultural colony schools. The head of the Section visited also 13 schools.

Most of the teachers of the districts of Cap Haitien, Plaisance and Ouanaminthe have participated in the festivals organized on July 18 and 19 at Cap Haitien. Six hundred pupils belonging to different communities have participated in a sportive parade which was attended by a great number of people. The teacher's conference was presided by the Head of the Section of Supervision and attended by distinguished personalities, among which the Prefect of the Department, the Bishop of Cap Haitien, the deputy Mr. Joseph D. Charles, the Mayor and Mr. Alex. Etienne, former Minister of Education and Agriculture. The pupils gave a show and a dancing party closed the festivals.

The Schools — The vacation period began on July 18. Basket trade articles made by the schools of the districts of Port-au-Prince, Les Cayes, Jacmel, Port-de-Paix, Cap Haitien, Jean Rabel, Petit Goâve and Port à Piment have been accepted for export.

A small school library has been established at the farm school at Lascahobas. A rural clinic was organized in the school at Thomassique. The farm school at Jean Rabel has a drug chest for the care of the pupils who are sick.

Many schools have organized meetings and shows to close the year.

The School at Chatard — A plot of land has been planted in tobacco in the gardens by the pupils of the third year to study the effect of climate on the growing of that plant. A group of pupils was occupied exclusively to the pruning of the nurseries. Courses have been offered on rubber, banana and the conservation of grains.

Besides the work of maintenance of the school houses and the school equipment, the pupils have made various articles in the shops, such as tables, bags, boxes, crosses, handles for bags, baskets, belts.

Practical School of Agriculture — Examinations have begun on June 30 and ended on July 3. A period of Assembly has been organized on July 2; Miss Mariette Jean spoke to the students of her stay in Puerto Rico, her studies in home economics and manual activities.

The Library has acquired 252 volumes given for the most part by the Office of the Secretary of Agriculture. The book in three volumes of Frederick Marchionna "Latex and Rubber Derivatives and their Industrial Applications" has been offered graciously. A collection of

Municipal Engineering Service

Port-au-Prince.- Drainage work has been carried out at Rue "4" and Rue "Boisrond Tonnerre". These streets received asphalt surfacings. At Street "4", the following work has been done: 106m25 of kerbstone necessitating 28 cu.m.275 of excavation, 19 cu.m.330 of foundation. A retaining wall has been built measuring 11m70 long and 2 meters high and also one manhole.

At the crossing of Rue Boisrond Tonnerre and the road leading to the "Saint Louis de Turgeau" church, 19 meters of kerbstone have been installed. Near the "Marcelin" bridge, the drainage system has been improved by the installation of 7m20 of 15" drains, two catch-basins and one manhole. The asphalt surfacing has been carried on over 900 sq. meters over the section comprised between the "Marcelin" bridge and the road leading to the Saint Louis chapel. This work necessitated 188 cu. meters of earthwork.

Improvements to Rue "Charles Cameau" have been made. Lateral canals have been straightened and pipes installed to facilitate entrance of cars have been replaced by others of larger diameters.

At the crossing of Rue Charles Cameau and Rue Magloire Ambroise, 16m65 of 18" drains have been installed.

Four manhole covers have been manufactured and installed: three at Rue Jérémie No. 3 and one at Rue Lafleur Ducheine.

Maintenance of earthen streets, repairs to concrete and asphalt surfacings, cleaning of sewers and decanting basins has been carried out as usual.

The various parks and public gardens have been maintained as usual; pruning of trees has been carried out in various sections of the city.

Pétionville.- With funds allotted by the Commune improvements to streets have been carried on: rue Darguin has been repaired over 220 meters between "Ravine Sable" and "Rue Bolard". At rue Villate embankment work has been resumed between rue Clearveaux and rue Aubran.

Cap Haitien.- Regular maintenance of streets has been carried on.

Gonaives.- Crevices have been repaired at rue du Cimetière, rue de la Révolution and rue du Quai. Approaches of the small bridge located at the entrance of the city have been rebuilt. Public parks have been maintained.

Saint Marc.- The "Philippe Guerrier" square has been maintained regularly; all the flower-beds have been weeded and two old "sabliers" cut down.

Port-de-Paix.- The surfacings of rue Benito Sylvain, rue Hôpital and rue Notre Dame have been repaired over an area of 310 sq. meters. Rue Cul de Sac has also been improved over a distance of 50 meters. At rue Benito Sylvain canals have been cleaned out over 145 meters and at rue Cul de Sac 38m.50 of kerbstone have been built.

Cayes.- At rue du Quai, rue de l'Union and rue Sténio Vincent crevices have been eliminated. One of the flower-beds of the Fort Islet park was about to be damaged by the waves of the sea; to remedy this condition a break-water has been built with coconut tree stumps.

Maintenance of the "Place d'Armes" has been carried on with funds allotted by the Commune.

Jacmel.- Rue de la Gosseline, rue Petite Batterie, and rue Saint Philippe received tuff surfacings over a distance of 407 meters.

Jérémie.- Work undertaken at rue du Jubilé has been continued: due to the depth of a canal dug a flag-stone culvert has been built; two small walls have been built at each end of the culvert. The gutter has been paved with large stones for 30 meters in length and 1m20 in width.

At Bordes, the road has been improved over 200 meters and trees cut down.

Hydraulic Services

The supply of the springs is still decreasing. At Pétionville an important loss of water was discovered at the "Tête de l'Eau" spring; work is now being done with a view to clearing the last manhole buried under 2m50 of gravel and sand in the river.

Regular maintenance work has been carried out in various systems. 300 ft. of 3" pipe have been cleaned out in the upper section of Lalue and results have been very satisfactory for the entire zone supplied by this line. At Rue Miller, work on the 4" line has been continued. 100 ft. of 2" pipe have been installed at the 4th Avenue of Bolosse. At Rue Boisrond Tonnerre, in view of the asphalt work, the secondary lines have been removed and reinstalled beneath the sidewalks. Work is now underway for the removal of the 2" line at rue "4" between avenues "N" and "L".

The Service answered three calls to fight fire. Seven sluice-gates have been repaired. At Pont Morin, the hydrant has been replaced. A 4" sluice-gate has been replaced at Avenue "L" and at Rue "3". Another one of similar diameter has been removed at Petit Four on the line taken care of avenue Charles Summer. At the Nord Alexis reservoir the western counterfort has been consolidated over a distance of 5 meters. The access to the reservoir has been improved.

The J.G. White Engineering Corporation made distribution trials of the water from the Carrefour Feuilles tunnel. The heavy pressure during the first trials caused ruptures in the old lines of Avenue Gregoire and Avenue Charles Summer; a few leaks have been noticed at Bois Verna and at Rue Boyer. Due to normal water supply from the tunnel, Avenue Gregoire and the lower sections of Avenues Lamartinière, Charles Summer and Rue Boyer are now regularly supplied. Water from Bourdon and Turgeau is now distributed only to the upper sections of the town. The daily supply of the tunnel is 1,100,000 gallons.

Table I

Flow of springs and consumption of chlorine

Springs	July 1940		July 1941		Difference	
	Flow in liters	Chlorine: pound	Flow in liters	Chlorine: pound	Flow in liters	Chlorine pound

Pétionv.	5,812,212	2,650,808				

Comparative statement of collections for the month of July of the three comparative following fiscal years:

Fiscal Year	Subscription	Estimate	Reestablishment	Totals
1938-39	19,683.00	1,197.17	220.00	21,100.17
1939-40	22,789.00	1,179.98	260.00	24,228.98
1940-41	26,183.00	1,247.95	320.00	27,750.95

During the month 143 pipe connections have been cut off for debt; 9 others previously cut off have been found operating, they have been cut off anew; 3 clandestine connections have been detected and cut off; 3 others have been cut off due to waste; 11 pipe connections have been cut off on demand of interested parties; 81 others have been reestablished; 16 now installations have been made for private parties.

Cap Haitien - Miragoâne - Anse à Veau.- Water has been supplied to these towns regularly; maintenance of systems has been normal.

Petit Goâve.- A leakage in the public fountain has been repaired. The system is operating normally.

Gonaives.- The reservoir has been cleaned out and freed from all calcareous deposits.

In the suburbs of "Soleil" three connections detected on the main conduit have been cut off and important leaks concealed under clumps of banana trees have been detected and eliminated by replacing all sections in bad condition. About 10 lead joints in bad condition have been replaced.

The section of old 2"-1/2 pipe of the canalisation of Avenue des Dattes passing through rue Louverture has been suppressed and a new canalisation of 3" pipe has been branched into the 5" line taking care of the eastern section of the city.

Saint Marc.- As a result of heavy rains during the month, the supply of the springs has increased. Maintenance has been normal. The canalisation taking care of the building accommodating the Court of 1st Instance has been repaired.

Jacmel.- The main conduit has been repaired. At rue Sténio Vincent a 10" sluice-gate has been replaced by a new one.

Cayes.- During the month, two disturbances occurred in the Electric Plant handicapping somewhat the water supply.

Aquin.- Certain joints have been repaired. Operation of the system has been normal.

Jérémie.- The supply of the spring has decreased. Subscribers receive water twice a day, from 6:00 to 9:00 a.m. and from 3:00 to 4:00 p.m.

Irrigation Service — The Seven irrigation systems operated normally. Water was supplied to subscribers in a satisfactory manner. Dykes have been normally maintained and canals cleaned out as shown below:

Cul de Sac Plain.- 701 lin. meters of the Roches Blanches - Bobin feeder, from Bobin basin to Cuvilly - Desvareux basin; 200 meters of the same canal below Borgella basin; 600 meters of Petit Bois feeder above and below the Turbé basin; 3,345 meters of the Pernier - L'Etoile feeder from Moquet basin to Lespinasse basin; 1000 meters of the Petit Bois feeder above the Lepine basin; 885 meters of the Pernier - L'Etoile feeder from Lespinasse basin to Bauduy basin. The cleaning of the Petit Bois feeder included the clearing of 15 cu. meters of gravel in the Masseau basin; the general basin of Despuzeau, the Bobin Cuvilly Desvareux, Borgella, Turbé, Moquet, Soissons, Greffin, Lespinasse, Lepine and Bauduy basins have also been cleaned out. Above the Greffin basin, the canal which was clocked up with a thick coat of gravel has been cleared over a distance of nearly 30 meters.

Léogane Plain.- 1,000 meters of the Guerin canal; 1000 meters of the Dampus canal; 500 meters of the Mme. Verguier canal; and 500 meters of the Macombe canal.

Verrettes Plain.- Cleaning has been continued.

Hydrography and Meteorology — During the month, measurements have been taken in the irrigation systems of River Grise, River Blanche, River Despuzeau, River Momance, River Matheux and Avezac. The tide-gauges installed over the canals have operated normally. A thermometrical station has been established Aux Cayes.

The following tables show the quantity of water supplied to each system and rainfalls registered during the month.

Name of System	Hectares	Water Supply Hect.-Meters: M. C. P. S. July 1940	July 1941	July 1940	July 1941	Depth of water in millimeter: Irrigation	Rainfall
Grise	8,495	711	707	82.3	81.8	83	113
Blanche	4,282	418	337	48.4	39.0	79	20.5
Despuzeau	3,453	150	109	17.5	12.6	31	4.0
Momance	4,005	595	743	68.9	85.9	185	134.0

Cap Haitien	36.0	7, 29, 30, 31	21.1	1, 2, 5, 7, 15, 16

Roads Service

The month of July has not been a very rainy month. As a result, beside maintenance work a great deal of major improvements have been made.

Department of the West.- From the Dessalines bridge going towards Croix des Missions, there has been undertaken the repairs to the side-ways of the asphalted road supporting heavy traffic of pedestrians and animals. These side-ways will receive a coat of gravel.

Between Cazeau and Croix des Bouquets, the road surfacing has been improved by means of the grader. This section takes care of heavy traffic. Between Fond Parisien and Morne Commissaires, widening of the road has been continued. Along the Kenscoff road young "Flamboyant" trees have been planted; the percentage of growth is reasonable.

In the sub-district of Petit Goâve, consolidation and drainage of all weak sections have been continued. The result obtained is considerable from Petit Goâve to Carrefour Desruisseaux, near Miragoâne. On these various sections 475 cu. meters of road material have been utilized.

District of Hinche.- During the month, 1 km.600 of road have been reconstructed of which 835 meters from Wampa to Belladère and 707 from Wampa towards Hinche. On the Pignon road 1 kilometer of road has been improved.

Department of the North.- The roads are in bad condition, a grader is working in this department.

Department of the Artibonite.- Rains have been frequent in this department and the rising of rivers caused some damages which have been immediately repaired.

District of Saint Marc.- Nothing special to report; traffic has been normal.

Department of the North West.- The various sections of roads are maintained regularly; one section located at 4 kms. from Mole Saint Nicolas has been improved over a distance of 350 meters.

Department of the South.- The various sections of road are now in good condition. The Grader is now working at Ducis towards Chantal.

District of Jérémie.- The weeding of the road from Roseaux to Glace has been undertaken. Between Jérémie - Moron - Chambellan - Dame Marie maintenance work executed facilitated traffic. Improvements to the La Saline - Bac section continued normally.

Maritime Works — The wharf of Jacmel has been damaged by a vessel of the Standard Fruit Company; repairs will be started soon at the expense of the company.

Telegraph, Telephone and Radio Service — During the month, the system operated without interruption of long duration.

The general inspection of all stations and circuits which forms the telephone system and made last month revealed the necessity of undertaking numerous repair works and reconstruction of main and secondary lines.

From Carefour Cazeaux to Croix des Bouquets, 480 lbs. of No. 12 copper wire served to replace the line which had too many joints over a distance of 8 kms.

From Port-au-Prince to Miragoâne three gangs composed of three men each are busy cutting down trees, straightening posts and replacing broken isolators.

Starting from Carrefour Desruisseaux a regular gang has started to make major improvements to both circuits: 308 cross-arms, 1,300 brackets and other accessories for installing the cross-arms have been distributed from the Brimballe bridge to Aux Cayes.

70 cross-arms, 280 brackets, 280 isolators have been installed at end of the month. 12 transpositions of lines have been remade.

The Automatic Centrals of Port-au-Prince, Cap Haitien, Jacmel and Cayes operated normally.

Three disturbances have been eliminated in the following cables at Port-au-Prince:

200	pair	cable	Rue Lamarre
26	"	"	Bizoton
26	"	"	Bas Peu de Chose

During the month, 56 subscribers discontinued their contracts: 36 installations have been made. Seven extensions have been disconnected and three connected.

The number of calls between Port-au-Prince and the other stations amounted to 2,778.

At the Radiotelegraph Station HHH operation was normal. The RCA receptor for traffic on 36 meters was out of order at the end of the month.

Traffic has been normal.

Electric Services

During the month, 31 electric installations have been inspected. 28 being found to be in accordance with regulations in force have been connected to the Electric Company's system. The three others have been disconnected.

The Electric systems in the other cities operated normally.
